DIGITAL ACCESS SOLUTIONS

Make New Ways

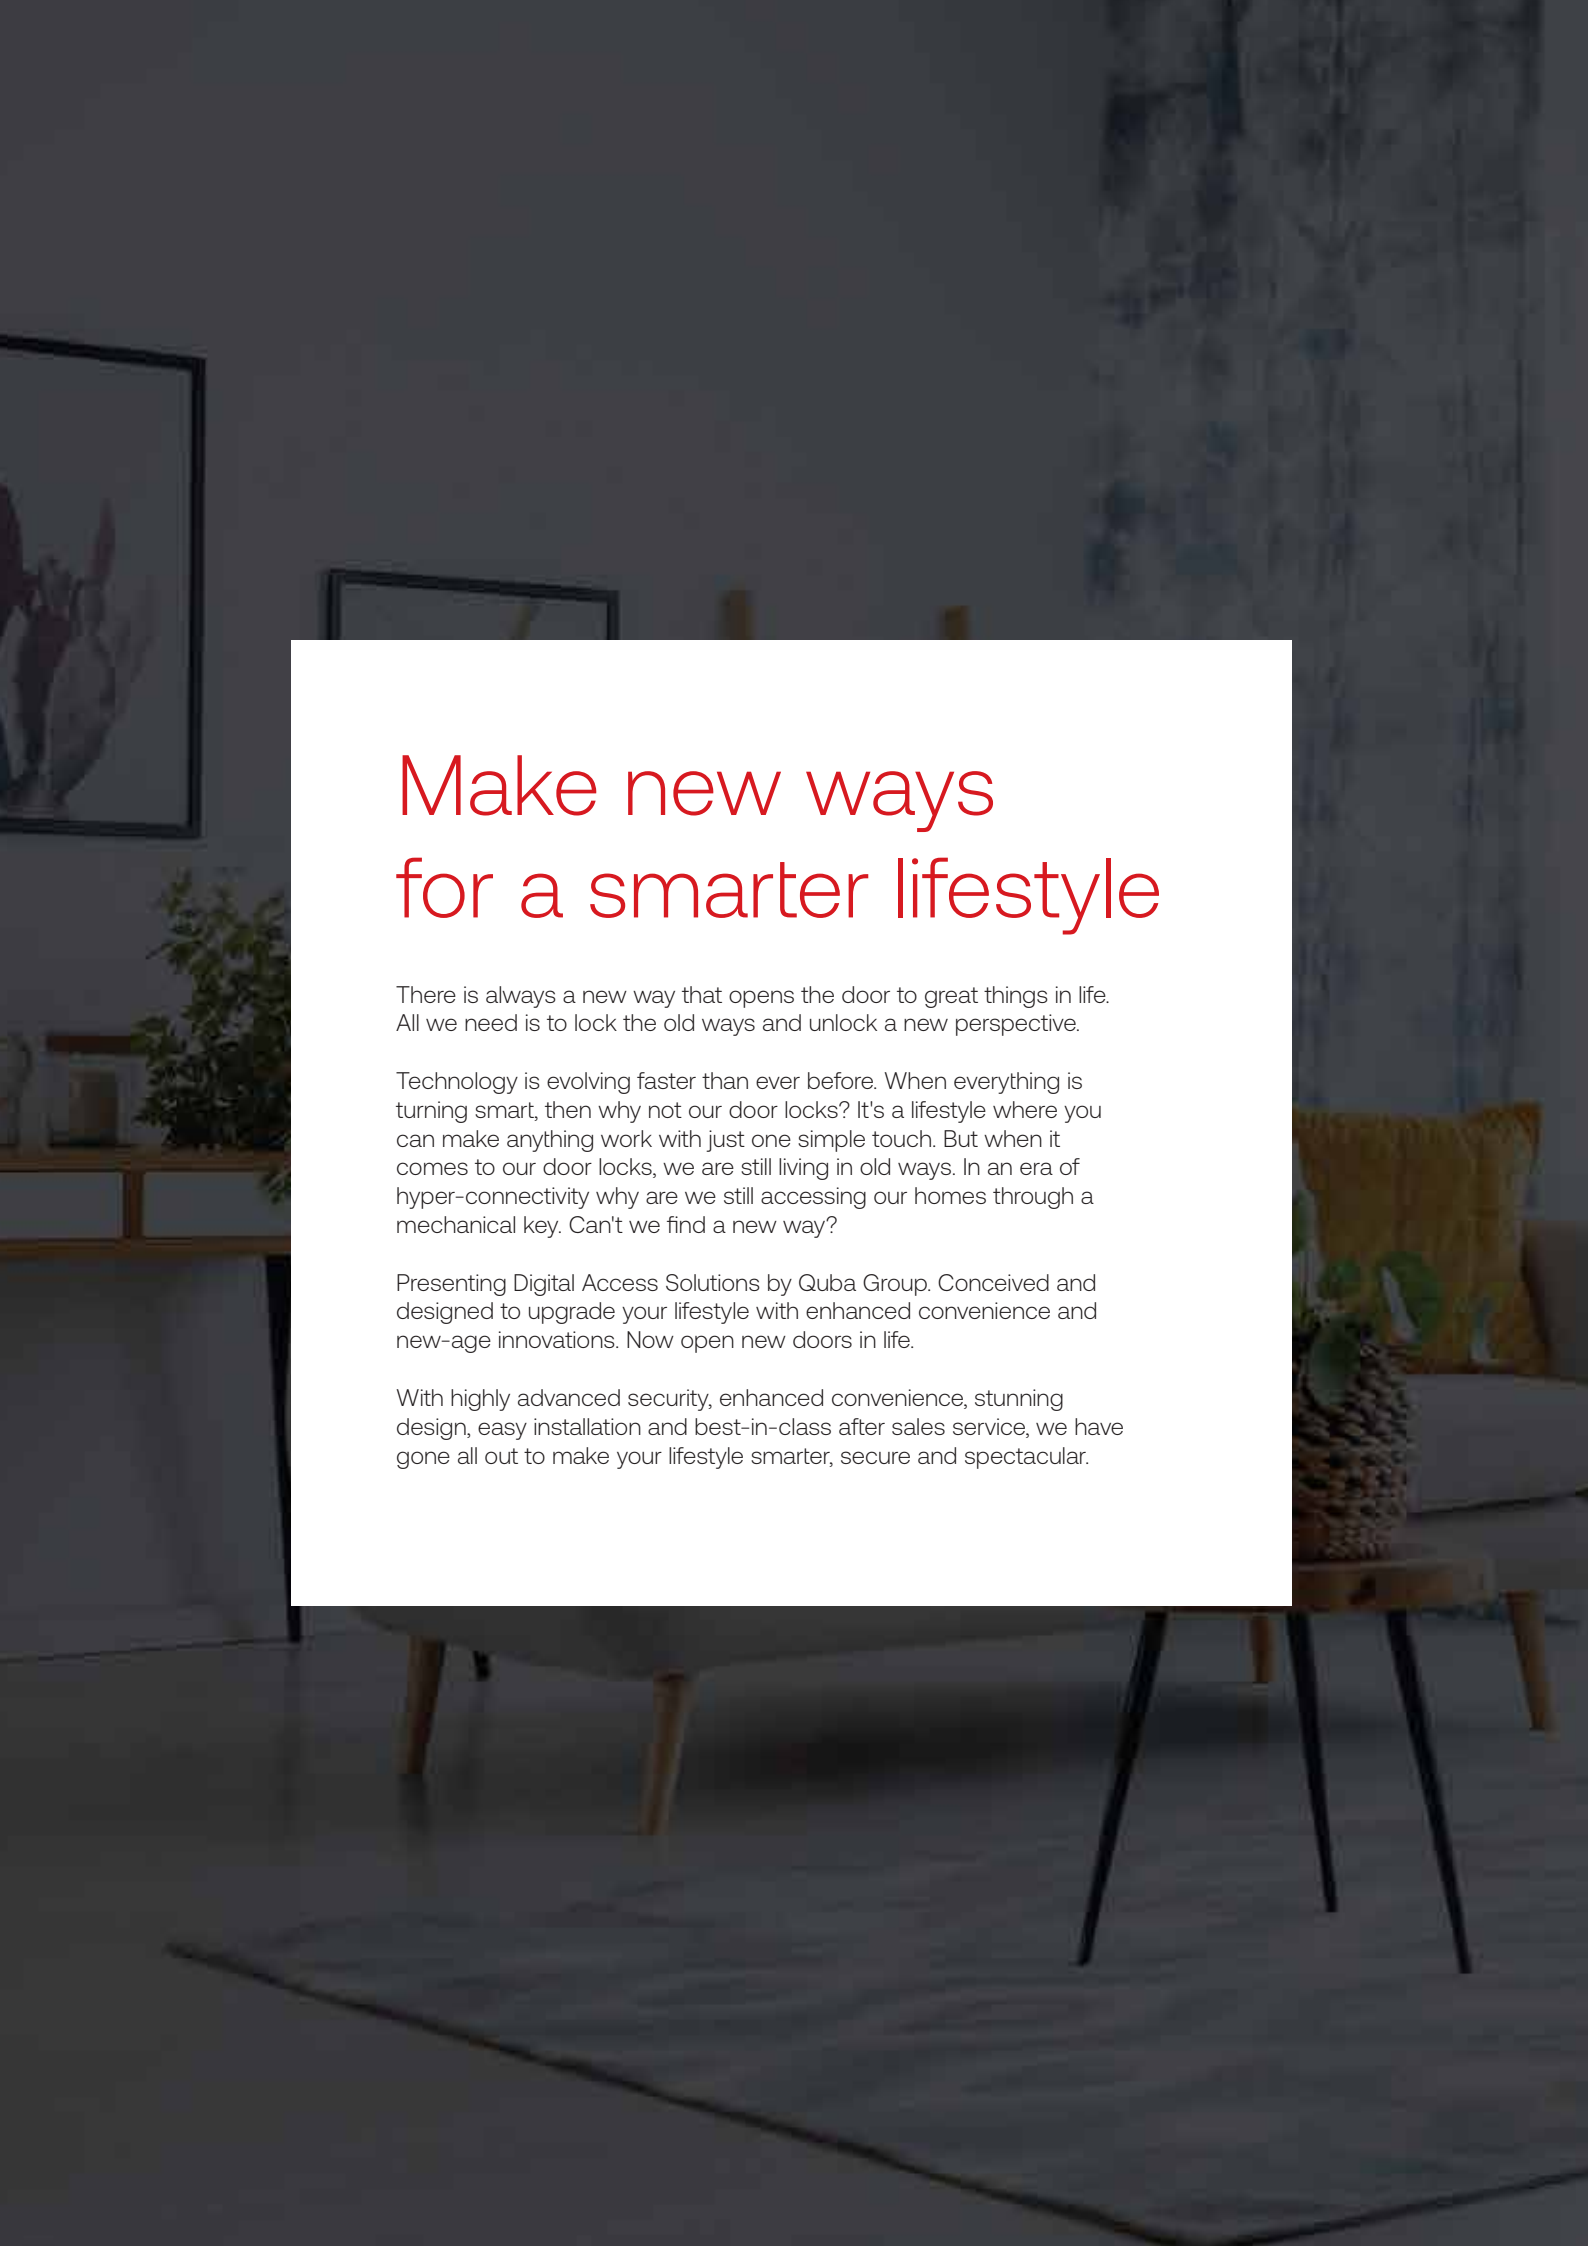

PRODUCT CATALOGUE

Unlocking the future of Digital Access Solutions

Open doors to new possibilities with our Digital Access Solutions, which feature our hi-tech and innovation-driven locks and safes, which enable you to take complete control of your home's safety and security. Our smart solutions provide unrivalled durability backed by experts and experience, which offer superior service and products for your loved ones.

Make new ways for a smarter lifestyle

There is always a new way that opens the door to great things in life. All we need is to lock the old ways and unlock a new perspective.

Technology is evolving faster than ever before. When everything is turning smart, then why not our door locks? It's a lifestyle where you can make anything work with just one simple touch. But when it comes to our door locks, we are still living in old ways. In an era of hyper-connectivity why are we still accessing our homes through a mechanical key. Can't we find a new way?

Presenting Digital Access Solutions by Quba Group. Conceived and designed to upgrade your lifestyle with enhanced convenience and new-age innovations. Now open new doors in life.

With highly advanced security, enhanced convenience, stunning design, easy installation and best-in-class after sales service, we have gone all out to make your lifestyle smarter, secure and spectacular.

quba

Uncompromising technology. Unrivalled security.

It is better to be safe than sorry when it comes to our offices or homes. That is why, we have unlocked the most dependable door lock technologies and solutions for you and your loved ones. The Anti-hijack technology keeps you warned about suspicious activities and makes it difficult for unwanted people to break in. 5-Way access allows you to unlock the door through Fingerprint, RFID Card, Password, Mobile App and Mechanical Keys. Features like emergency jump-start bring in more convenience. In case your locks battery drained completely, you have an option to jump-start your lock through a USB power bank or 9V battery.

Seamless. Matchless. Limitless. Security Solutions.

With class-leading craftsmanship and design, every lock offers you the best in technology, features and security solutions so that you can open new doors.

Security at your fingertips.

You decide whom to let in, how to let in and when to let in. From anywhere, anytime. Manage access rights at the tap of a button on a mobile app for you and those who really matter.

With you. Before and after.

Right from guiding the right product for you to installing it with a passionate after-sales service team, we're always there 24/7 at every step of the way unlocking convenience for you.

PRODUCT FEATURES

Smart Access Modes

Take control of your door and life with state-of-the-art digital access solutions and security features for daily operations of our digital lock.

Capacitive Fingerprint Scan

We use the latest 360° capacitive fingerprint scan technology which is more responsive and accurate.

Keypad

Keypad access allows you to unlock the door by keying in a unique numeric password. Our digital lock also gives you an option to set up multiple passwords with different usage rights.

RFID Card

RFID access allows you to unlock the door by showing the RFID keycard to the lock; which recognizes the unique code embedded in the keycard.

Mechanical Keys

All digital locks come with a set of Mechanical Keys for emergency access in situations like battery failure. Our keys come with a computerized cross design for additional security which makes the duplication close to impossible.

Mobile App

Now operate your Quba digital lock through a mobile app from any part of the world. Using Quba Wi-Fi module, you can connect your phone to your Quba digital lock to enjoy enhanced convenience.

Smart Password

The smart password technology allows you to hide your numeric password between random numbers. Let's assume that your password is 12345678; the Password function allows you to hide this password before, after or in between other random digits. For example, the password can be set up to 8 or 12 digits while the random cushioning numbers can be included up to 30 digits. This function is particularly helpful when you don't want to reveal your password to a person standing next to you while you are accessing your home.

Smart Freeze

This feature restricts the number of incorrect entries of access with a wrong password or unfamiliar fingerprint. 5 to 10 wrong entries will result in a lock-freeze for up to 5 minutes. This feature reduces the possibility of unwanted break-ins.

Special Access Rights

Admin Rights

As an admin, you can add, modify or delete other admins or users. You can also reset the lock, check the settings and logs, perform data queries, access advanced options, upload user data and update the firmware.

User Rights

With ‘User Rights’ you will be given an unique password that will allow you to access the door lock at any point of time.

Guest Rights

You can set a one-time password for visiting guests to allow them into your homes – it is very handy when your guests arrive before you or want to use your home for a few days while you are away on a vacation!

Know Your Alarms

Low Battery Alarm
In case the lock battery is very low or nearing discharge, the Low Battery Alarm will set off.

Door Locking Status Alarm
The alarm sets off in case the deadbolt is not properly engaged and the door remains unlocked.

High Temperature Alarm
The alarm sets off in case of a fire or any other event where the inside room temperature touches or exceeds 70°C (the alarm can be deactivated either by removing the battery or waiting till the room temperature falls below 70°C).

Break-in Alarm
In case any intruder tries to forcibly break the lock to enter your home, the alarm will set off.

Hijack Alarm / Real-Time Push Alarm:
The anti-hijack alarm feature in the app has been designed keeping in mind your safety. The feature detects if someone else is trying to gain control over your digital lock and trying to break into your home. In case of such a detection, the user is sent an alarm notification on his/her mobile app.

Quba Smart App Features:

Remote Unlocking

Unlocking your door has never been easier with the Quba Digital Smart App anytime, anywhere.

Permanent Passwords

You can assign a permanent password for your family members for convenient access to your home.

Time Limited Passwords

You can create a password for a specific time period which can vary from a few hours to a few days. It is useful in case you want to give access to visiting guests for a limited time frame for entries and exits.

One-Time Password

One type password is tipically valid for a single use, minimising the risk of unauthorised access.

Low Battery Alert:

Get notifications about the battery status of the lock.

Audit Trail History/Real-time history log:

Maintains a history log of all the entries and exits.

Quba Smart App:

Upgrade your lifestyle with Quba's Smart App that makes home security simpler, more secure and convenient than ever before.

How to connect your Quba Digital Lock?

1. Simply download Quba Smart App from the Apple Store or Google Play Store
2. Open the application and click on 'Register Now' button and create your account
3. Now on the home screen, click on add a digital lock, press the '+' icon and connect your Quba Digital Lock
4. You can connect your Digital lock with the help of Bluetooth connection or with a Wi-Fi network
5. Connect your Quba Digital Lock
6. Once done, you are all set to operate your digital lock with the help of your smartphone

Note:

Quba Smart Mobile App functionality varies as per the lock you choose.

1. You have to download the mobile app from the Play Store / iOS Store as per the details mentioned in the packaging.
2. Mobile devices (smartphone, iPad, etc.) should be equipped with Bluetooth 4.0 or higher, If you are using an incompatible device, it may not operate fluently.
3. The Wi-Fi module which comes with Qrious / Qdot has to be placed on the perimeter of 5 to 10 meters.
4. If you want to share the Quba Smart App access with your family and friends, make sure they are registered on the app.
5. The default requirement for the Wi-Fi should be 2.4ghz.

The Quba Digital Locks comes with 3 years of warranty.

Quba understands that a reliable digital lock means safety and security to you. That's why we are committed to providing you with the best possible service and ensuring that Quba locks are working at all times. Quba digital locks have been created by taking into account the demands of modern-day living; they're durable, technologically advanced, and offer a wide range of features.
